

10 Gigabit Single-Fiber 40km Optical Module Wavelength

Overview

Operating at a wavelength of 1310nm, this high-performance module supports transmission up to 40 kilometers and is fully compliant with SFP+ MSA and IEEE 802. It is ideal for 10 Gigabit Ethernet, SONET/SDH, and data center interconnects, featuring Digital. This hot-pluggable SFP+ transceiver is engineered to transmit 10Gbps data streams over single-mode fiber (SMF) for link lengths up to 40 kilometers, making it indispensable for metro Ethernet, campus backbone networks, enterprise data center interconnects (DCIs), and telecom access networks. A 15 dB optical link budget supports metro and long-haul links well beyond standard LR reach, and the multi-rate envelope spans 1. SFP-10G-ER-S does not support FCoE. Compared with short-reach and long-reach 10G SFP+ optics.
