

10000-core optical fiber cable

Overview

It's China's first optical cable with more than 10,000 cores and it has the highest fiber count in an optical cable in the world. The cable can meet the construction needs of ultra-large-scale artificial intelligence data centers and facilitate the interconnectivity of computing power. China Information and Communication Technologies Group Corporation (CICT) has successfully developed a 13,824-core ultra-high-density optical cable, which has already been mass-produced. 32808ft) Single-mode (OS2) Simplex Bare Fiber Optic Cable. OS2 for use in 9/125um 10G/100G fiber optic networks This Genuine Corning® SMF-28e+ OS2 fiber provides superior bending performance, backward compatibility and ability to minimize signal loss which occurs. Over 30 years ago, OCC became a pioneer in the design and production of fiber optic cable, and we've been innovating ever since. OCC experts are smart and responsive, just like our products. These are interchangeably referred to as fibre optic and optical fibre.
