

10G OSFP Optical Module for Broadcast Transmission

Overview

T1-SFP-10G-SR is a high-performance, cost-effective module. The transceiver consists of three sections: a VCSEL laser transmitter, a PIN photodiode integrated with a trans-impedance preamplifier (TIA), and an MCU control unit. All modules satisfy class 1 laser safety requirements. The Cisco ® 10GBASE SFP+ modules (Figure 1) give you a wide variety of 10 Gigabit Ethernet connectivity options for data center, enterprise wiring closet, and service provider transport applications. ● Industry's smallest 10G. 10G SFP+ optical transceivers including SR, LR, ER and ZR for enterprise networks and data center connectivity. They are designed for use in 25/28G Gb/s links over multimode or single mode fiber. DESIGNED FOR USE IN 10GB/S DATA RATE LINKS.
