

12-core fiber optic patch panel supplier

Summary of Content

Several manufacturers offer 12-core fiber optic patch panels, including Sopto, Anteolectric, Necero, and Fibconet, with options for rack-mounted, wall-mounted, and drawer-type installations.

Key Manufacturers and Products

Sopto provides 12-core fiber patch panels in both fixed and drawer types, compatible with SC, FC, ST, and LC adapters. Their panels are 19-inch rack-mounted, made from 1.2mm cold-rolled steel with electrostatic coating, and designed for fiber splicing, storage, and distribution in FTTX and telecom networks. Anteolectric manufactures 12-core panels using aluminum alloy and durable plastic. These panels feature front-side operation, modular design, and drawer-style installation. They support ribbon and bunch fiber cables, with splice trays compatible with 12FC, SC, ST, and LC adapters. Operating temperature ranges from -25°C to +55°C, suitable for data centers and FTTX projects. Necero offers universal 12-port optical fiber boxes for termination, fusion, and protection of optical cores. Their panels support ST, SC, FC, LC, MTRJ, and MPO/MTP adapters, with sufficient fiber winding space to maintain bending radius. Necero has over 20 years of experience in fiber optic manufacturing and provides OEM services. Fibconet provides wall-mounted and rack-mounted 12-core fiber patch panels designed for efficient cable management and protection. Their panels are customizable to accommodate different fiber lengths and distribution requirements, suitable for telecom, enterprise, and ISP networks.

Features to Consider

- Mounting Type: Rack-mounted (19-inch standard) or wall-mounted options.
