

20kW remote power supply to Congo

Summary of Content

A 20kW remote power supply in the DRC can be sourced via dual-fuel generators or solar hybrid systems with lithium-ion storage, designed for tropical climates and remote deployment.

Generator-Based Solutions

For immediate or continuous power needs, dual-fuel generators are a practical choice. Models like the Portable Tractor Supply 20kW CNG/LPG genset offer:

- Dual fuel capability (CNG and LPG) for flexibility in fuel sourcing
- Single-phase and three-phase AC output, compatible with industrial and commercial equipment
- Weatherproof enclosures and robust steel frames, suitable for harsh tropical conditions
- Digital control interfaces with remote monitoring, allowing operation oversight from afar
- Low-noise operation and high-capacity fuel tanks, ideal for continuous use in remote areas . Delivery for custom configurations typically ranges from 3-6 weeks, so planning ahead is essential .

Solar Hybrid and Containerized Systems

For sustainable, off-grid power, solar hybrid systems with lithium-ion batteries are increasingly popular in the DRC:

- High-efficiency solar panels operate at 60-80% efficiency even in overcast conditions, suitable for Bas-Congo and other rainy regions .
