

24-port Ethernet switch with 2-port fiber optic ports

Overview

This switch is a next generation Layer 2 managed switch with 128Gbps switching capacity. It provides up to (24) dual speed fiber slots and (4) 10Gig aggregation ports, it's an ideal switch for fiber aggregation applications. Cisco MDS 9124V 64-Gbps 24-Port Fibre Channel switch brings the latest high-performance, low-latency Fibre Channel Storage Area Network (SAN) technology to market. Quality of Service: Supports 8 egress queues per port enable. • Connects up to 24 network devices - PCs, printers, and servers - to share and transfer files and videos across your network • Power over Ethernet easily and cost-effectively powers wireless access points, video cameras, and other network-connected endpoints • Simplified, web-based management for. The DXS-3400 Series switches feature a modular fan and power supply design for a high availability architecture. Physical and virtual switch stacking allow the switches to be managed from. The DGS-F1026P-E features 24 ports 10/100BASE-TX ports that support the IEEE 802. With total power budget of 250W. The DGS-F1026P-E is a Plug-and-Play device that requires no configuration, so setup is simple and hassle-free, and you can easily connect multiple computers, share. 24 Fiber Port & 2GE Fiber & 2/4 UTP lan port Fiber optic ethernet switch, Fiber Media Converter Multi-gigabit optical aggregation series is my company based independent software research and development from a fiber aggregation switches, which have 24 * 1000M optical ports and 2/4 * 10/100 / 1000M.
