

288-core standard optical cable junction box

Overview

A 288-core optical cable joint is an ideal solution for organizations that require high-capacity fiber optic networks. It offers several advantages, including high capacity, space-saving design, cost-effectiveness, easy installation, high reliability, future-proofing, and. High Capacity: The primary advantage of a 288-core optical cable joint is its high capacity. This high capacity allows for greater flexibility in network design and greater data. GJS-25-8 fiber cable joint box belongs to the mechanical pressure sealing joint system, mainly used to splice and wire the fiber cables in the FTTx network project. These devices and systems use light to transport data and provide better dependability and bandwidth than conventional copper connections. It is waterproof and dust proof and suitable for outdoor aerial hanged, pole mounted, wall mounted, duct or buried application Working temperature $-35^{\circ}\text{C}\sim 70^{\circ}\text{C}$, cold and heat resistance, electrical. This product has acquired the relevant product qualification (s)/license (s) of certain applicable country/countries. View moreThe fiber optic splice closures (FOSC) are used to distribute, splice, and store the outdoor optical cables that enter and exit from the ends of the closure.
