

48-core optical fiber trunk

Overview

48 core MPO/MTP Trunk Fiber Optic Cable ribbon and trunk multicore cable assemblies facilitate rapid deployment of high density backbone cabling in data centers and other high fiber environment, reducing network in installation or reconfiguration time and cost. MTP/MPO are. EDGE™ MTP® trunks provide the backbone of the EDGE Solution. With non-pinned MTP connectors on both ends of the cable, the trunks are designed to interface with EDGE or Plug & Play™ modules. All trunks are shipped with strain-relief clips that allow for tool-less installation in both EDGE and Plug. This robust, high-density fiber optic assembly is engineered for demanding data center environments, backbone infrastructure, and high-speed interconnects.
