

A Somali company that manufactures fiber optic sensors

Summary of Content

Kocent Optec Limited and local FTTA solution providers are key suppliers of fiber optic components and sensors for the Somali market.

Key Manufacturers and Suppliers

Kocent Optec Limited is a leading provider of fiber optic solutions for Somalia, specializing in FTTA (Fiber-to-the-Antenna) systems. Their products are designed to withstand Somalia's challenging environmental conditions, including high humidity and extreme temperatures, ensuring reliable connectivity for telecom operators like Hormuud, Somtel, and Telcom Somalia. They offer tactical fiber optic cables, MPO patch cords, PLC splitters, and SFP/QSFP assemblies, all inspected rigorously to meet international standards such as ITU-T and Telcordia. Somni Solutions focuses on high-performance fiber optic sensors, particularly Fiber Bragg Grating (FBG) sensors, which measure parameters like temperature, pressure, acceleration, and displacement. These sensors are fully optical, immune to electromagnetic interference, and suitable for applications in medical monitoring, industrial automation, environmental control, and defense. Fiberlogix manufactures specialty optical fibers for sensing applications, including Distributed Temperature Sensing (DTS), Distributed Acoustic Sensing (DAS), and strain or vibration monitoring. Their products are encapsulated in installable cables or metal tubes, making them suitable for telecom, data centers, autonomous vehicles, and biomedical equipment.

Applications and Capabilities

- Telecommunications: FTTA solutions, micro-cell deployment, and 5G readiness.
