

ASEAN Level 2 Distribution Box Standard

Overview

Standard IP56 rating minimum - dust tight and powerful water jets resistant. Materials tested under prolonged 60°C heat and 95% humidity. Anti-corrosion coatings validated by marine environments. Our boxes should be as resilient as that street food vendor riding out the seasonal. ASEAN Members states have undertaken to harmonise their national standards with international standards as a means of removing unnecessary trade barriers. Taking into consideration the importance of external trade to ASEAN and the need for the ASEAN Community as a whole to remain. Simple: distribution boxes designed around ASEAN's actual realities instead of copied standards from other continents. The "three-phase" designation indicates compatibility with three-phase power systems common in industrial and. The global mains power supply is divided into two major voltage systems: 220~240V/50Hz is the mainstream, covering China (single-phase 220V, three-phase 380V), Europe (single-phase 230V, three-phase 400V), the United Kingdom (240V/415V), Australia and New Zealand, Southeast Asia and African.
