

# Affordable high and low voltage complete sets of equipment

## Summary of Content

Affordable complete sets of high and low voltage electrical equipment are available as modular switchgear, low-voltage distribution cabinets, and prefabricated substations suitable for industrial, commercial, and residential applications.

### Low Voltage Complete Sets

Low voltage complete set distribution cabinets consolidate switchgear, circuit breakers, transformers, meters, and protective relays into a single enclosure, simplifying power management and enhancing safety. These cabinets are typically pre-assembled and factory-tested, offering quick deployment and reliability. They are ideal for temporary power setups, urban substations, street lighting, and compact commercial installations. Modular or removable types provide flexibility for future expansion, while integrated transformer types save space in compact installations.

### High and Low Voltage Complete Sets

High and low voltage complete sets include high-voltage cable tap boxes, withdrawable low-voltage switchgear, and modular substations. These systems are designed for industrial plants, substations, petrochemical facilities, steel mills, transportation, and residential communities. Key features include:

- High-voltage compartments with ring main units or gas-insulated switchgear (up to 40.5 kV)
- Low-voltage compartments with withdrawable switchgear (0.38-0.66 kV)
- Transformer compartments with oil-immersed or dry-type transformers
