

Afghanistan Dust Explosion-proof Distribution Box Model

Summary of Content

Ex-certified dust explosion-proof distribution boxes are available in stainless steel, aluminum, and reinforced polyester, suitable for Zone 21 and Zone 22 hazardous areas.

Overview

Dust explosion-proof distribution boxes, also known as Ex distribution boards, are designed to safely control and distribute electrical power in environments with combustible dust. These enclosures prevent sparks, heat, or electrical faults from igniting surrounding dust or gases, making them essential for industries such as oil and gas, chemical plants, mining, food processing, and pharmaceuticals .

Key Features

- **Materials:** Stainless steel (AISI 304L or 316L), aluminum, or reinforced polyester for corrosion resistance and durability .
- **Certifications:** ATEX, IECEx, and UL certified for compliance with international safety standards .
- **Zone Classification:** Suitable for Zone 21 and Zone 22 (combustible dust) and Zone 1 and Zone 2 (flammable gases or vapors), .
- **Ingress Protection:** High IP ratings (e.g., IP66) to prevent dust and water ingress .
- **Modular Design:** Customizable internal layouts for circuit breakers, fuses, terminal blocks, and control devices .
