

Albania Warranty for ONU Optical Network Unit 400G

Summary of Content

Warranty coverage for 400G ONUs in Albania typically depends on the manufacturer and local distributor, with standard terms ranging from 1 to 3 years.

General Warranty Information for ONUs

Optical Network Units (ONUs) like the PLANET XGPN-400AXV and GPN-400AXV are high-performance devices designed for fiber-to-the-home (FTTH) deployments, supporting GPON/XG-PON standards, Wi-Fi 6, and multiple LAN/VoIP interfaces. Manufacturers generally provide limited hardware warranties covering defects in materials and workmanship. Typical coverage includes:

- Duration: 1-3 years from the date of purchase, depending on the model and region.
- Scope: Repair or replacement of defective units; firmware updates may also be included.
- Exclusions: Damage from misuse, unauthorized modifications, or environmental factors outside specified operating conditions.

Local Considerations in Albania

Warranty enforcement in Albania depends on the availability of authorized distributors or service centers. PLANET Technology and other ONU vendors often partner with regional resellers who handle:

- Product registration for warranty validation.
- Replacement or repair services.
