

Andorra Warranty Server Rack Outdoor Type

Summary of Content

Outdoor server racks are weatherproof enclosures designed to protect IT equipment from rain, dust, extreme temperatures, and vandalism, with IP55–IP66 ratings and optional cooling systems.

Key Features

Weatherproof and Durable Construction: Outdoor server racks are typically made from stainless steel, galvanized steel, or aluminum, providing corrosion resistance and structural strength for harsh environments . They are designed to withstand rain, snow, dust, UV exposure, and temperature fluctuations . **IP and NEMA Ratings:** Common ratings include IP55 (dustproof and splash-resistant) and IP66/NEMA 4X (fully sealed against water and dust), ensuring reliable protection for sensitive electronics . **Cooling and Ventilation:** Many outdoor cabinets feature ventilation openings, rain hoods, and built-in fans to prevent overheating. Some models include AC units or filtered vents for enhanced airflow while keeping moisture out . **Mounting Options:** Outdoor racks are available as free-standing floor cabinets or wall-mounted enclosures, allowing flexible deployment in telecom sites, industrial areas, or remote locations . **Security:** Lockable doors and internal fixtures protect equipment from unauthorized access and vandalism . **Compatibility:** Standard 19-inch rack rails accommodate servers, switches, patch panels, and UPS systems, with options for custom shelves and cable management .
