

Angola New Energy Big Data Center

Overview

Angola has launched a new corporate data center in Luanda to centralize technological infrastructure and support AI-driven operations across Angola's oil and gas sector. Angola's parastatal Sonangol reached a pivotal milestone this year with the inauguration of its new corporate data center in Luanda. Launched on February 27, the 920-m2 facility marks the company's 50th anniversary by centralizing previously fragmented technological assets into a single. The National Fuel Society of Angola (Sonangol), in Luanda, opened a new Corporate Data Center, an infrastructure that consolidates the company as an integrated energy company prepared for the challenges of digital and energy transition. According to a statement from the Ministry of Mineral. Raxio Angola will be the country's first carrier-neutral Tier III data centre, playing a key role in strengthening Angola's digital infrastructure. The facility will enhance data processing for reservoir modeling, production optimization, and emissions tracking. The Angolan government officially inaugurated its new national Data Center and Cloud infrastructure today in Camama, Luanda. Minister of Telecommunications Mário.
