

Are electrical distribution boxes expensive at construction sites in Yemen

Summary of Content

Electrical distribution boxes in Yemen range widely in price depending on type, size, and certification, from small junction boxes around \$10-\$30 to industrial low-voltage distribution cabinets costing several hundred dollars or more.

Types and Price Ranges

- **Small Junction Boxes:** Compact, IP65-rated ABS plastic boxes suitable for outdoor or indoor wiring projects are available in packs (e.g., 6 pieces) for approximately \$10-\$30 per set depending on size and supplier . These are typically used for minor electrical connections or small-scale construction projects.
- **Low-Voltage Distribution Cabinets:** Industrial-grade cabinets, such as those used in factories or large construction sites, include molded case circuit breakers (MCCBs), miniature circuit breakers (MCBs), and insulated copper busbars. Prices for these IEC-compliant cabinets can range from \$300 to \$1,000 or more, depending on the number of circuits, protection features, and local assembly . These are essential for protecting equipment from voltage fluctuations and ensuring reliable power distribution.

Local Suppliers in Yemen

- **AlGawf Trading & Services Co.:** Offers a wide range of electrical and energy products across multiple cities including Sana'a, Taiz, and Aden .
