

Argentina Data Center Rack Waterproof Type

Summary of Content

IP66-rated outdoor racks provide robust waterproof and dustproof protection for data center equipment in Argentina.

Overview of Waterproof Rack Types

For environments where water, dust, or extreme weather may affect IT equipment, outdoor or weatherproof racks are recommended. These racks are designed to protect servers, switches, UPS units, and other critical devices from environmental hazards. A common standard is IP66, which ensures complete protection against dust ingress and powerful water jets from any direction .

Key Features

- **Material:** Typically constructed from 1.5mm thick galvanized steel with corrosion-resistant coatings, such as RAL 7035 epoxy polyester powder .
- **Design:** Single-wall or double-wall enclosures with watertight seals to prevent rain, snow, and dust penetration.
- **Mounting:** Can be wall-mounted or pole-mounted for flexibility in outdoor setups.
- **Cooling Options:** Optional fans or airflow management systems to maintain optimal operating temperatures in outdoor conditions .
- **Compatibility:** Designed to fit standard 19-inch equipment, with heights ranging from 12U to 42U depending on the model .
