

Automatic closing of small distribution box

Overview

A box closing machine is an automated system that seals cardboard boxes, precisely closing the top flaps after the products have been placed inside. Ranpak offers multiple solutions that can perform this function based on the specific needs of our customers base on box type, daily output, end-user requirements, and more. Panotec solutions, designed to adapt to boxes of varying dimensions, automatically close FEFCO 410 models with hot melt glue and support both batch. Automated box closing provides significant productivity gains in automated end-of-line packaging. Whether you are seeking to. The HAT machine is specially designed for automatic closing of cardboard boxes using hot-melt, which guarantees their perfect closing. – The model HAT/M is a single-head model.
