

Bahamas Explosion-proof Distribution Box Model List

Summary of Content

Key explosion-proof distribution box models available for the Bahamas include HRMD92 series, BXM(D)8050 series, and miniature Bahamas-specific units.

HRMD92 Series

The HRMD92 series features flameproof enclosures (Ex d IIB+H2) suitable for feed distribution in control and distribution systems. These boxes are made of stainless steel with specialized hinge structures to protect flameproof joints and extend service life. They can be combined freely to save space and meet various system requirements. The series supports a wide range of components including MCCBs, MCBs, AC contactors, PLCs, soft starters, frequency converters, and motor protection switches. Customization is available to meet user-specific requirements and compliance limits .

BXM(D)8050 Series

The BXM(D)8050 series is designed for lighting and power distribution with modular GRP construction. These boxes feature external rotary actuators for main and branch switches, complete internal wiring to terminals, and international brand explosion-proof terminals. Cable glands and other special requirements can be added on request. The modular design allows flexible combination and installation .
