

Bahrain Plastic Distribution Box Specifications

Summary of Content

Plastic distribution boxes in Bahrain are typically made from durable polypropylene or polyethylene, designed for stacking, transport, and storage, with customizable sizes and features to suit industrial, retail, and logistics needs.

Material and Construction

Plastic distribution boxes in Bahrain are generally manufactured from high-density polyethylene (HDPE) or polypropylene (PP), providing strength, impact resistance, and long-term durability for repeated use in storage and transport . These materials are lightweight yet robust, resistant to moisture, chemicals, and temperature variations, making them suitable for industrial and food-grade applications.

Dimensions and Capacity

These boxes come in various standard and custom sizes, often ranging from small 10–20 liter units to large 60–100 liter crates . Many suppliers offer stackable designs with reinforced corners and interlocking lids to maximize storage efficiency and safe transport. Customization options include ventilation holes, handles, and labeling areas for easy identification and handling.

Features

- Stackable and nestable for efficient storage and transport .
- Durable construction to withstand heavy loads and repeated handling.
