

# Base Station Energy Solution 50kW for Private Power Grid

## Summary of Content

50kW/100kWh battery energy storage systems (BESS) provide reliable, modular, and scalable solutions for private power grids, integrating solar PV, hybrid inverters, and intelligent energy management.

### Overview of 50kW BESS Options

Modern 50kW BESS are designed for commercial, industrial, and microgrid applications, offering both on-grid and off-grid operation. These systems typically include:

- **Battery Modules:** High-quality LiFePO<sub>4</sub> cells with long cycle life (6,000–6,500 cycles) and service life exceeding 10 years, ensuring durability and stable performance .
- **Hybrid Inverters:** 50kW three-phase inverters enable DC/AC conversion, grid connection, and backup power during outages .
- **Energy Management Systems (EMS):** Intelligent EMS allows real-time monitoring, scheduling, load management, and integration with solar PV or other renewable sources .
- **Safety Features:** Multi-layer protection including fire alarms, thermal management, over-voltage, under-voltage, and short-circuit safeguards .
- **Modular Design:** Cabinets are compact and scalable, allowing expansion up to 2 MWh or parallel connection for growing energy demands .

### Key Functionalities
