

Base Station Power Management System 48V for Island Use

Overview

Reliable telecom rectifier and base station power system with 48V power supply and 24V battery charger. N+1 redundancy, hot-swap modules, outdoor enclosure options. Delta's TBM48V50IP65 battery is an excellent energy backup source for 48V outdoor applications, such as 3G/4G/5G telecom base stations and micro stations. Why Choose LiFePO4 Batteries?

Lithium Iron Phosphate (LiFePO4) batteries are a type of lithium-ion battery with. What applications is the RCT2000 24V/48V series suitable for?

It is primarily designed for scenarios requiring DC power supply, such as communication base stations, data centers, access network equipment rooms, and industrial control systems. To achieve this, the system utilizes advanced power conversion technology to ensure stable. Power plant or substation power for controlling, protection and automatic device, emergency lighting, communications, steam turbine DC oil pump and so on independent DC systems. It can provide reliable power supply in the case of a power failure completely in plant or substation.
