

Belize Communication and Power Towers

Overview

BCSL operates a countrywide repeater network on the highest access mountain in Belize. The system provides power from ten wind turbines, solar panels and two backup generators with remote control from anywhere in the world. While wireless VHF radios (push-to-talk) was the beginning, over the years communication functions extended to networking, power systems, security cameras, consulting and other new technological advances. Over the. There are 1,594 miles of roads in Belize, 303 of which are paved. The system has the ability to provide 120VDC power and a commercial UPS. Summit Towers Limited (STL) offers a wide range of telecom solutions where connectivity plays a key role by enabling the digital transformation in the scenarios where we live, work and entertain.
