

Belize Outdoor Distribution Box Specifications

Summary of Content

Belize outdoor distribution boxes are designed for high reliability, weather resistance, and compliance with NEC and NEMA standards, supporting voltages up to 12kV and currents up to 630A.

General Overview

Belize outdoor distribution boxes serve as junction points for splitting incoming power into multiple branch circuits for outdoor installations, including urban roads, residential communities, airports, and industrial facilities . They are available in both above-ground and underground configurations, with underground units integrating aesthetic features like advertising light boxes while minimizing environmental impact .

Construction and Materials

- **Box Shell:** Corrosion-resistant stainless steel for underground units; heavy-duty UV-resistant PVC for above-ground weatherproof boxes .
- **Protection Rating:** IP65/IP66 for PVC boxes; IP68 for underground stainless steel units, allowing operation even when submerged .
- **Pit/Foundation:** Reinforced concrete columns $\geq 150\text{mm}$ thick with precast cement slab covers and openable inspection holes .
- **Weatherproofing:** Rain-tight enclosures per NEC 312.2, with ventilation holes designed for rain and waterproofing, and submersible pumps for automatic drainage in underground units .
