

Blue plastic label on the distribution box

Summary of Content

The blue plastic label, often referred to as the "Blue Box," is a regulatory feature on medicinal product packaging that highlights member state-specific information for EU-authorized medicines.

Purpose of the Blue Box

The Blue Box is a section on the outer packaging of medicinal products authorized through the centralized EU procedure. It is outlined by a blue border and contains information specific to each member state, such as reimbursement conditions, legal status, or other national requirements, while the rest of the packaging remains standardized across the EU. This ensures that all critical regulatory information is clearly visible and compliant with Directive 2001/83/EC, Article 63.

Regulatory Requirements

- The Blue Box must be included on the outer label of the medicinal product.
- It allows for multilingual text, provided the information is identical in all languages used, except for national-specific details which may vary by member state.
- The inclusion of the Blue Box ensures that the packaging meets EU labeling standards and facilitates proper identification, reimbursement, and legal compliance in each country.

Practical Implications

- The Blue Box helps pharmacists, healthcare providers, and regulators quickly identify country-specific information without altering the standardized EU labeling.
