

Box-type integrated monitoring power supply

Overview

The box-type integrated inverter combines the DC cabinet, inverter, medium-voltage transformer, grid-connected cabinet, and system monitoring functions, and comes with standard power dispatch interfaces. An essential element in such monitoring systems is the supervision and monitoring of power rails. Our highly efficient 240 W and 480 W DIN rail power supplies with integrated power supply condition display (PSCD) enable faster application analysis. Application analysis PULS portfolio Application data Power supply system Contact Power supplies with monitoring display support decisions based on. The High Power-D-Box MRU is a compact power distribution system for plug-in type hydraulic-magnetic circuit breakers. The integrated DC sensors enable measuring data acquisition (U, I, P) of the supply groups A and B. Its compact, clearance-free design and wiring save space and installation time. The MRU10 Monitoring & Reporting Unit analyses the sensor data, shows it on site. Suited to use on the following types of power supply systems: multiControl plus, midiControl plus, miniControl plus, microControl plus, myControl plus.
