

Broadband Leased Line Terminal Box

Overview

Your new leased line's hardware consists of two parts:- 1. The Network Termination Equipment (Or NTE for short) 2. The Service Access Router - sent directly to site in a rectangular brown box. Everything required is included in the box with the router. It is sometimes also known as a private circuit, private connect, and as a data line. Leased lines are usually symmetrical, meaning they have the same upload. What is a Leased Line?

A leased line is a dedicated, high-speed internet connection that delivers symmetrical upload and download speeds. Unlike standard business broadband, which is a shared service, a leased line provides an exclusive connection between your business premises and your internet. Leased lines are dedicated, fixed-bandwidth data connections that provide a consistent and reliable internet service. Leased lines offer a fixed. Internet access may be provided to customers via 2 of commonly used approach – Broadband and Leased Line.
