

CE Certified AOC Active Optical Cable 16T

Overview

6T LPO OSFP active optical cable modules are designed for use in 1. Forward error correction (FEC) is required to be implemented by the host in order to ensure reliable system operation. They are compliant with the OSFP MSA, IEEE802. 6T/800G DAC/AOC/AEC cables are compliant with MSA and IEEE standards for guaranteed compatibility and optimal performance and suitable for servers, switches, storage, etc. Purchase from nearby warehouses. With high-speed, high-reliability transmission, FS twinax cables come in different lengths to support different transmission data rates, such as 1G, 10G. OSFP (Octal Small Form-factor Pluggable) is a 4 or 8-lane electrical interface supporting 400G (4×100G, 8×50G), 800G (8×100G), and 1. 6T (8×200G) via PAM4 modulation. Designed for AI/ML workloads and hyperscale deployments, OSFP transceivers offer high signal integrity and efficient thermal.
