

CIF Price for 42U Cold Aisle Servers in Carrier Backbone Network Data Centers

Summary of Content

The estimated CIF price for a 42U cold aisle server rack ranges from \$1,500 to \$3,500 per unit, depending on specifications, cooling integration, and supplier location.

Pricing Overview

For a standard 42U server rack with cold aisle containment features, the base material cost typically falls between \$1,000 and \$2,500 per unit before shipping and installation, depending on door type, airflow design, and integrated PDUs (Power Distribution Units) . High-efficiency racks designed for cold aisle containment with reinforced steel frames, tempered glass doors, and modular cooling compatibility may increase the price toward \$2,500-\$3,000 .

Factors Affecting CIF Price

- **Rack Construction and Materials:** Cold-rolled steel frames, tempered glass doors, and reinforced rails improve durability but add cost .
- **Cooling Integration:** Compatibility with in-row or overhead cooling units, and precision containment systems like AisleLok, can increase the unit price .
- **Power and Management Features:** Smart PDUs, cable management, and KVM over IP solutions add to the total cost .
- **Supplier and Shipping:** Direct manufacturers with 5+ years of experience typically offer better quality control. CIF pricing includes shipping, insurance, and port handling, which can add 5-15% to the base cost depending on origin and destination
