

CNC bending of cable tray elbows

Overview

A CNC press brake with an advanced controller (Delem, ESA, or Cybelec) is preferred because cable tray bending often requires multiple bends per part with precise back gauge positioning. Tonnage requirements are typically moderate: 40-160 tons depending on material thickness and. A bend cable tray elbow is a pre-manufactured, structural fitting used to change cable tray direction horizontally or vertically—most commonly at 90° or 45° angles. Unlike generic “bends,” true elbows are engineered with precise internal radii, reinforced flanges, and compatible mounting. Our company stands behind the quality and performance of the Cable Tray Bending Machine with comprehensive remote technical support and warranty services. It synchronizes every production stage to eliminate errors, cuts material waste, and ensures consistent quality. Use a CNC punching machine for mounting holes, slots, louvers and repeated patterns; use a CNC press brake for flanges, brackets, elbows, tees and reducers; use a fiber laser. Pioneers in the industry, we offer aluminum cable tray and cable tray bend from India. Product Details: Founded in the year 2006 “ Electro Power System ” is competing with the other esteemed competitors by the support of highly skilled panel of experts.
