

Cable tray bend interface

Overview

Cable tray fittings are used to change direction, transition, branch, or adapt cable trays within complex wiring routes. The analysis includes structural types (ladder, perforated, wire mesh), specific bend fittings (horizontal and vertical risers).

Characteristic of this steel type is that – prior to mechanical deformation – it is given a zinc coating by means of a continuous dipping process. This zinc coating is easily deformed. A cathodic action occurs on cut surfaces (up to 1. First, the steel is. HellermannTytonGÇÖs low voltage raceway (TSR) is a one piece, non-metallic, adhesive backed, latching raceway designed to aesthetically organize and route communications wires, including high speed UTP cable and fiber optic cable, from the telecom room to the work area. Type is TSR2-25-1 and Color. Cable Tray Fitting, 90° Junction Kit. Includes: (1) Hardware for (1) Tee (2) 90° Bends. Ensure compliance with NEC, IEC, and NEMA bend-radius standards for safe cable routing. We recognize the need for a complete cable tray reference source for electrical engineers and designers.
