

Cable tray partition accessories

Summary of Content

Cable tray accessories with partitions are specialized components designed to separate and organize cables within a tray, enhancing safety, accessibility, and EMI protection.

Overview

Cable tray partitions are used to segregate power, data, and communication cables within a single tray, preventing interference, simplifying maintenance, and improving system organization. They are essential in environments where multiple cable types coexist, such as industrial facilities, data centers, and commercial buildings .

Types of Partition Accessories

- Divider Strips and Panels
 - Straight divider strips for separating cables along the length of a tray.
 - Elbow and tee dividers for routing around corners or intersections.
- Available in materials like stainless steel, galvanized steel, and powder-coated aluminum .
- Lockable Covers and Partition Plates
 - Provide additional protection and secure separation.
 - Often used in high-traffic or washdown areas to prevent cable displacement .
- Snap-In or Push-Pin Dividers
 - Designed for Snap Track or modular trays, allowing quick installation without field fabrication.
