

Cable trays inside the mobile aggregation server room

Overview

Use dedicated trays for each to prevent electromagnetic interference and heat buildup. In this guide, we will walk through how to select, design, and install cable trays specifically for server room environments, helping you avoid common mistakes and build a system that is both efficient and future-proof. The neatness or chaos you see in those cable runs says a lot about how that facility is managed. A wide selections of supports and accesories give every installation a professional look. Basor provide a safe. Global Recycled Standard (GRS) certified products contain recycled content that has been independently verified at each stage of the supply chain, from the source to the final product and meet social, environmental, and chemical requirements. According to the ITIC 2024 Hourly Cost of Downtime Report, a single hour of unplanned outage could cost over CAD 300,000 for more than 90% of mid-size and large enterprises.
