

Can the distribution box be surface-mounted

Overview

The Distribution Box Series, which offers aesthetic solutions with distinguished design and also provides safe insulation, is waiting to take its place in your spaces with two types, flush-mounted and surface-mounted, as well as opaque cover options. In our shop you will not only receive components for safe and modern electrical installation and sub-distribution. However, during the project phase or a renovation, the most frequent question arises: Should I choose a flush mount or a surface mount distribution box?

In this guide, we will examine the advantages of both solutions and the critical technical details you need to consider when choosing the right. Fuse boxes are an important part of the house electrics, especially in modern architecture and today's Smart Home functions, which is why we offer the DISBOX-T series, a surface-mounted distribution box that meets the highest design requirements. Smooth side walls, ultra-flat construction and tidy. Discover now the heat and impact resistant distribution boxes that will protect your safety. 3 to 15 modules: Wide range of sizes for all setups.
