

Congo OSFP Optical Module 200G

Overview

It uses advanced DSP, coherent detection, and high-order modulation technologies to deliver 200Gbps transmission capacity with high spectral efficiency, making it suitable for metro networks, DCI, and long-distance optical transport applications. Its core strengths lie in robust dispersion and. The 200G-CFP2-DCO is a tunable C-Band DWDM coherent optical transceiver module in CFP2 form factor. Supporting 100G/200G data rates with DP-QPSK and DP-16QAM modulation, it achieves up to 2000km reach over SMF. Features integrated DSP with soft-decision FEC, ITLA transmitter, and ICR receiver. Purchase from nearby warehouses. Lifetime Warranty, 100% Tested. What is a 200G Coherent CFP2 Optical Module?

PITTSBURGH, March 7, 2023 (GLOBE NEWSWIRE) – Coherent Corp. (NYSE: COHR), a leader in optical communications components and subsystems, today announced that it will demonstrate an optical transceiver module operating at 200 Gbps per optical lane and co-packaged optical (CPO) multimode optical. FS InfiniBand 400G/200G HDR optical modules and cables solution used for high-bandwidth data transmission, data center and AI computing applications.
