

Construction of a Data Center in the Netherlands

Overview

Seven hyperscale data centers are currently under construction in the Netherlands, with permits already granted that make a recent motion by the House of Representatives to halt large-scale construction ineffective. The Dutch Datacentra Association (DDA) has confirmed that four of these facilities. Pure Data Centres Group (Pure DC), the designer, developer, and operator of hyperscale cloud and AI data centres, today announced the launch of its new Amsterdam data centre. Situated in Westpoort, Amsterdam, Pure DC. The Netherlands Data Center Construction Market report segments the industry into By Tier Type (Tier 1 and 2, Tier 3, Tier 4), By Data Center Size (Small, Medium, Large, Mega, Massive), By Infrastructure (Cooling Infrastructure, Power Infrastructure, Racks and Cabinets, Servers, Networking). This report covers the Netherlands data center facilities analysis, which will provide the following information on the colocation data centers: Coverage of Aalsmeer, Almere, Almere, Alphen aan den Rijn, Amsterdam, Apeldoorn, Arnhem, Delft, Deventer, Dronten, Ede, Eemshaven, Eindhoven. With great pleasure, we present the 10th edition of our 'State of the Dutch Data Centers' report. This milestone edition, themed 'Powering Progress' reflects our continuous efforts to strengthen the data center industry in the Netherlands. The company said the data center, which will be built on a site at the Port of Rotterdam, will offer “compute at industrial scale and strengthen Europe's position in the global AI economy.
