

Cost of Huijue Trough-Type Fireproof Cable Tray

Summary of Content

Huijue trough-type fireproof cable trays typically range from \$20 to \$80 per meter, depending on material, size, and fireproof specifications.

Pricing Overview

The cost of Huijue fireproof trough-type cable trays varies based on material (SS304, SS316, Q235 steel), width (50mm–1200mm), length (2–7 meters), and fireproof coating. Factory-direct prices on platforms like Alibaba indicate that MOQ is usually 100 meters, and prices are negotiable for bulk orders. For standard Q235 steel trays with fire-retardant coating, prices generally fall between \$20–\$50 per meter, while stainless steel variants (SS304/SS316) can range from \$50–\$80 per meter due to higher material costs and corrosion resistance.

Factors Affecting Cost

- **Material:** Stainless steel trays are more expensive than Q235 steel or aluminum due to durability and corrosion resistance.
- **Size and Load Capacity:** Wider trays or those designed for heavy-duty applications cost more.
- **Fireproof Rating:** Trays with higher fire resistance (up to 90 minutes) or specialized coatings may increase the price.
- **Customization:** Custom lengths, widths, or additional anti-corrosion treatments can affect pricing.
