

# Cost of fiber optic splice boxes in Africa

## Summary of Content

Fiber optic splice boxes in Africa typically range from around KSh 1,000 to several hundred US dollars depending on type, capacity, and material.

### Price Ranges and Examples

- Kenya: A metal fiber optic splicing box is priced at KSh 1,000–1,500 excluding VAT, suitable for basic outdoor or indoor installations .
- South Africa: Termination and splice boxes vary widely depending on capacity and design. For example, 2-port splice boxes designed for indoor or outdoor use are marketed as affordable solutions, typically costing under \$50–\$100 USD per unit .
- Advanced Fiber Splice Boxes: Units with 8-core splice cassettes, IP65-rated for dust and moisture protection, and suitable for FTTx networks are available, often costing more due to higher capacity and robust ABS construction .

### Factors Affecting Cost

- Material: ABS plastic boxes are generally cheaper than metal enclosures but still provide weatherproofing. Metal boxes may offer extra durability but at a higher price .
- Port Capacity: Boxes with more ports or higher core capacity (e.g., 8-core or 12-core) are more expensive than small 2-port boxes .
- Indoor vs Outdoor Use: Outdoor-rated boxes with IP65 or higher protection against dust and moisture cost more than indoor-only boxes .
- Brand and Supplier: Prices vary by supplier and country, with South African and Kenyan distributors offering different models and pricing structures .
