

Cost of galvanized cable trays in Southern Europe

Summary of Content

Hot-dip galvanized cable trays in Southern Europe typically cost between \$10 and \$25 per meter, depending on type, size, and project specifications.

Price Range

The cost of galvanized cable trays varies widely based on material, design, and supplier. For hot-dip galvanized steel ladder-type trays, prices generally range from \$10 to \$25 per meter for standard catalog items, with shorter or lighter-duty trays at the lower end and heavy-duty or wide trays at the higher end . Pre-galvanized steel trays are usually cheaper but less durable in corrosive environments . Custom or engineered solutions for large infrastructure projects can exceed this range due to design, certification, and project management costs .

Factors Affecting Cost

- **Material and Coating:** Hot-dip galvanizing increases corrosion resistance but adds to the upfront cost. Stainless steel is more expensive, while aluminum is lightweight but pricier than steel .
- **Tray Type and Size:** Ladder trays are more expensive than perforated or wire mesh trays due to higher load capacity . Width, height, and length also influence pricing .
- **Labor and Energy:** Manufacturing processes like cutting, welding, and galvanizing are energy-intensive, and labor costs in Southern Europe contribute to the final price .
