

Delivery time for antistatic flooring cable trays and armored packaging

Summary of Content

Standard delivery for fiberglass cable trays is typically 3 weeks, while antistatic packaging lead times vary depending on customization and pre-assembly options.

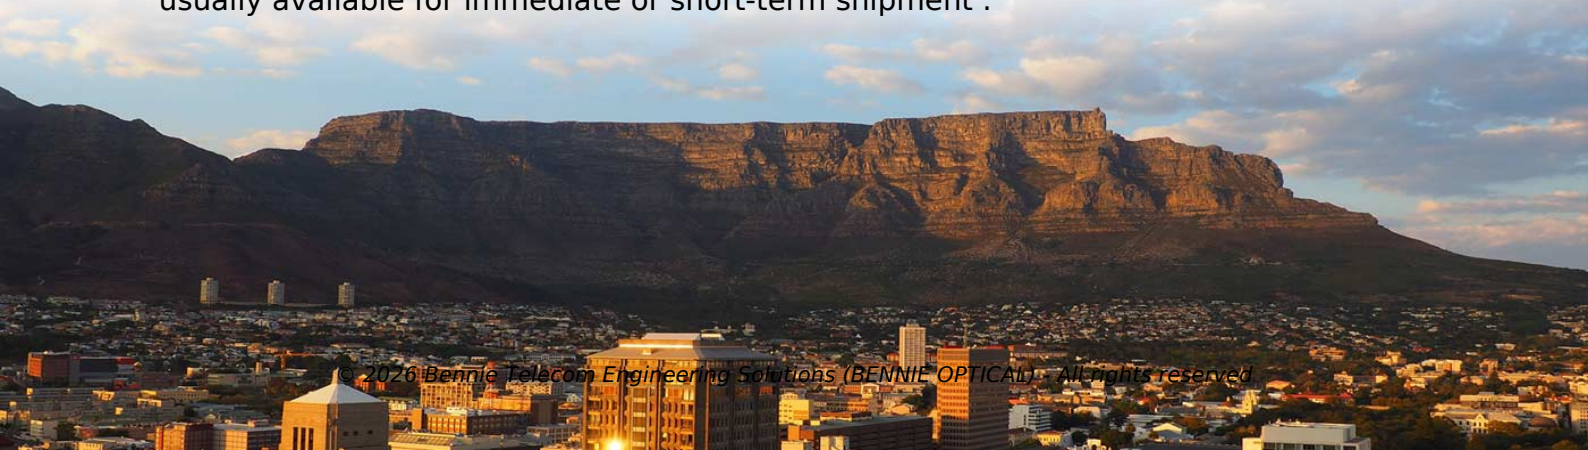

Fiberglass Cable Trays

For fiberglass cable trays, including straight sections, fittings, and covers, standard lead times are generally around 3 weeks for polyester and vinyl ester trays, though some 9-inch rung polyester trays can be shipped in 7 days . Lead times may vary depending on the specific series, part numbers, and any coast guard or specialized requirements. It is recommended to contact your local representative or customer service to confirm exact shipping dates . These trays are suitable for harsh environments and can support heavy loads, making them ideal for industrial and marine applications.

Antistatic Packaging

Antistatic packaging includes trays, boxes, foam sheets, and custom inserts designed to prevent electrostatic discharge (ESD) damage to sensitive components . Delivery times for these products depend on:

- Standard stock items: Pre-made antistatic trays, bubble bags, and foam rolls are usually available for immediate or short-term shipment .
