

Direct connection of drop fiber optic cable

Overview

Direct cable is a simple solution for fiber drop cable installation. Upgrades require excavation or access to aerial infrastructure, specialized equipment, and can lead to potential signal degradation. Fiber optic drop cables are the critical link between the main fiber optic network and individual buildings or residences. These cable bridge the gap between an ISP's backbone infrastructure and end-user premises, enabling high-speed internet, voice, and data service in residential. FTTH (Fiber to the Home) drop cable is the final-section optical cable that connects the distribution point (fiber distribution box, FDB) to the subscriber's premises. The drop optical cable constitutes the optical cable line from the user access point to the terminal, which is crucial to the FTTH network. Drop cables are. Fiber Optic Drop cable is mostly the single-core, double-core structure, but can also be made into a four-core structure, flat figure-8 structure, reinforcement is located in the center of the two circles, metal or non-metallic structure can be used, the fiber is located in the geometric center of.
