

Distribution box switch 630

Overview

● Outputs support 250-frame MCCBs (125A-250A, 3P/4P), for three-or four-phase circuits in commercial and industrial applications. ● Complies with IEC/EN 61439-2:2024, with V0 PA66 flame-retardant barriers and 6 mm T3 copper conductors for strength, reliability, and safety. Conjoined type can be a three-phase colsed offed simultaneously and the splited type can be operated independently. ● Main switch (input). The 630 distribution board is an essential electrical component designed to ensure safe and efficient distribution of electricity within various commercial and industrial environments. Serving as a central hub for controlling electrical supply, it plays a critical role in maintaining power. KYN28A-12 armored mobile metal-enclosed switchgear is suitable for 3. Can be used for single busbar, single busbar section system or double busbar. MDmax St low voltage switchgear features a double-folded aluminum-zinc coated frame, removable top busbar cover, and three functional units (drawer-type, movable, insert-type). Supports up to 36 drawer circuits, three-position switching without protection reduction, and sound/light/text position. Tinned copper or aluminum block allows for copper or aluminum conductor direct connections, or using ferrule Screw retaining cover is hinged and removable Design allows for visual inspection of conductor and confirmation of connection Modular snap-together blocks for building multi-pole power.
