

Does the Moxa industrial switch require configuration

Overview

A Moxa unmanaged Ethernet switch is ideal for simple, plug-and-play connectivity in industrial networks. It requires no configuration to deploy and maintain, and ensures reliable communication. In chapter 2, we explain how to configure your smart switch the first time you use it, and give an overview of the management function icons that. Moxa provides this document as is, without warranty of any kind, either expressed or implied, including, but not limited to, its particular purpose. Moxa reserves the right to make improvements and/or changes to this manual, or to the products and/or the programs described in this manual, at any. A Moxa switch in unmanaged form works as a simple industrial switch that requires no setup; just connect your devices, and it starts forwarding data. This suite of useful tools helps users set the IP addresses of multiple devices with one click, configure the redundant protocols and VLAN.
