

Does the distribution box have a model and specifications

Summary of Content

Yes, distribution boxes have specific models and detailed specifications, including voltage ratings, dimensions, and types for various applications.

Models and Types

Distribution boxes are available in multiple models and series, each designed for specific applications:

- Low-voltage fixed switchgear: Includes GGD, GDH, and PGL series, commonly used in substations, power plants, and industrial settings. These typically operate at AC 50Hz with rated voltages around 380V, offering high breaking capacity and stable performance .
- Low-voltage withdrawable switchgear: Includes GCK, GCS, and MNS series, suitable for motor control centers, lighting systems, and industrial power distribution. Rated voltages range from 400V to 660V, with AC frequencies of 50Hz or 60Hz .
- Residential and commercial DB boxes: Often classified by number of ways (1-way to 36-ways) and mounting type, such as TOP-TS, TOP-TF, TOP-LS, TOP-PS, TOP-PF, and TOP-S .

Specifications

Key specifications of distribution boxes include:

- Voltage and frequency: Typically low-voltage AC systems, ranging from 220V to 660V, with 50Hz or 60Hz operation .
