

Dominic Relay Protection System Manufacturer

Summary of Content

ERLPhase Power Technologies Ltd. is the manufacturer of the Dominic Relay Protection System.

ERLPhase Power Technologies, headquartered in Winnipeg, Canada, is an ISO 9001:2015 certified manufacturer specializing in digital protection relays and power system recorders, serving a global customer base. Founded in 1991, the company is recognized as one of the leading protective relay manufacturers, offering high-performance relays and digital fault recording systems suitable for transmission, distribution, and industrial power networks. Their products are designed to provide reliable protection, monitoring, and control for electrical grids, ensuring safety and operational efficiency. The Dominic Relay Protection System likely falls under ERLPhase's portfolio of digital protection relays, which are engineered for high-accuracy fault detection, overcurrent protection, and system monitoring. ERLPhase's relays are widely used in high-growth markets, including Asia-Pacific, and are known for their cost-effective performance and adaptability to challenging environments. For comparison, other notable protective relay manufacturers include Rockwell Automation, SOLCON, TERASAKI ELECTRIC, ZIV, L&T, and Larsen & Toubro, each offering specialized solutions for industrial and utility applications. However, ERLPhase is specifically highlighted for its digital relay technology and fault recording systems, making it the primary manufacturer associated with the Dominic Relay Protection System. For more information, ERLPhase's official website provides detailed product specifications, technical support, and contact information for global customers.
