

Double-layer cable tray for signal and power lines

Overview

These trays feature a dual-level design, enabling efficient separation of cable types (e., power and data), reducing interference and simplifying maintenance. Choosing the right type of double cable tray is essential for ensuring safety, durability, and optimal. en completely installed, without damage either to conductors or structural system use maintain spacing or to keep cables in place when the tray is ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when. ABB designs and manufactures cable tray systems, including perforated tray, cable ladder, channel tray and strut (metal framing), directly from production facilities in Canada and Saudi Arabia. Combining local manufacture and distribution with an extensive product range, these facilities ensure we. us-trations without notice.
