

Dual-channel optical splitter

Overview

Splitters with a defined split ratio from one or two input fibers to 2 output fibers. The available split counts are 1x2 and 2x2 or 1x4 1x8 in split ratios of 50/50, 40/60, 30/70, 20/80, 10/90, 5/95, 1/99, 60/40, 70/30, 80/20, 90/10, 95/5, and 99/1. An optical splitter is a crucial passive fiber optic device that splits and combines optical signals. 24k Gold Connector with 1mm low-loss core, low-jitter synthetic fiber and heavy metal connectors to dampen vibration, giving you the ultimate. Optical splitters and couplers split or combine light—distributing signals injected into a single fiber strand to multiple fibers, enabling point to multi-point communication in Fiber To The Home (FTTH) networks based on ITU. No need for extra power supply, yet performance stays consistently stable beyond others. Thorlabs' Single Mode 1x16 Fiber Optic Planar Lightwave Circuit (PLC) Splitters allow a user to split a single input signal evenly into 16 output signals, which is ideal for passive optical networks (PON) and other high-channel-count applications.
