

Dual-light fusion thermal imaging multimeter

Overview

Its dual-spectrum fusion technology combines visible light and infrared imaging (resolution 428 x 320) and makes hidden hotspots visible from -20°C to 550°C while capturing fine structures - ideal for industrial maintenance, HVAC and troubleshooting electrical. Its dual-spectrum fusion technology combines visible light and infrared imaging (resolution 428 x 320) and makes hidden hotspots visible from -20°C to 550°C while capturing fine structures - ideal for industrial maintenance, HVAC and troubleshooting electrical. DUAL-LIGHT FUSION: The integrated thermal imaging camera combines visible light and infrared channels to produce synchronized images that contain both texture details and thermal distribution data. Coordinated multi-wavelength detection makes it easier to detect thermal anomalies even in extreme. 2-in-1 Thermal Imager Multimeter: 428x320 resolution thermal imaging and a 20,000 word multimeter in one device The SH9A thermal imaging camera with multimeter provides more comprehensive troubleshooting and analysis and is ideal for use in the field in electrical, mechanical, construction. Shop BSIDE SH7 & SH9 Thermal Imaging Multimeters with infrared cameras, touchscreens & full DMM functions. Perfect for electrical & industrial testing Requirements and requirements declaration: This insurance product has been designed by us based on our many years of experience in the field of property insurance and is intended to protect your belongings in the event of damage. For more sustainability and enjoyment of your products. Please read. [428x320 IR Infrared Camera]: Thermal imaging camera has 428 x 320 ir resolution, which could help you detect potential problems early and diagnose problems reliably.
