

Dual power supply for fire protection distribution box

Overview

According to the "Code for Fire Protection Design of Buildings" GB50016-2014, combined with China's current economic and technical conditions, the power supply status in different regions, and the specific situation of fire-fighting electrical equipment, dual power sources can be. According to the "Code for Fire Protection Design of Buildings" GB50016-2014, combined with China's current economic and technical conditions, the power supply status in different regions, and the specific situation of fire-fighting electrical equipment, dual power sources can be. Internal Structure: The core internal components of the dedicated distribution box are sourced from high-quality brands like Chint, ensuring stable and safe fire power supply. It is equipped with a Chint NHR6 series dual-power transfer switch supporting automatic/manual bidirectional switching. Syncro Power fully certified to EN54-4 power supplies provide a stable and fully regulated, true 24V output for fire alarm system applications under all power conditions. The unique regulation techniques ensure that even when running on standby batteries, a stable 24V supply is available to all. A dual power supply cabinet helps manage power distribution with greater stability in industrial or commercial settings. Inconsistent supply or equipment overload can disrupt operations. This may increase downtime, maintenance costs, and safety risks. Kunshan Shuntian Metal Products Co. is a precision sheet metal fabrication expert established in 2001, operating from a 14,500 square meter production base. Equipped with advanced laser cutting and CNC punching machines, the company specializes in high-quality industrial enclosures, control.
