

Dubai Ladder Cable Tray Specifications and Dimensions

Summary of Content

Ladder-type cable trays in Dubai are commonly available in standard lengths of 3 meters, with widths ranging from 100 mm to 600 mm and side wall depths from 50 mm to 150 mm, depending on load requirements.

Standard Dimensions

- **Length:** Most ladder trays are supplied in 3-meter sections, with some suppliers offering 6-meter lengths for longer runs to reduce joints and supports .
- **Width:** Typical widths range from 100 mm to 600 mm, with common increments of 100 mm. Narrower trays are used for small bundles of control or data cables, while wider trays accommodate heavy-duty power cables or high-density installations .
- **Side Wall Depth (Height):** Standard depths vary from 50 mm (light duty) to 150 mm (extra heavy duty). Depth selection depends on the number and size of cables, as well as ventilation requirements in Dubai's high ambient temperatures .
- **Material and Finish:** Ladder trays are manufactured in hot-dipped galvanized steel, mill galvanized steel, aluminum, stainless steel (SS304/SS316L), or PVC-coated finishes to resist corrosion, especially in coastal areas .

Duty Classifications

- **Light Duty:** Suitable for small instrumentation, data, and communication cables.
- **Medium Duty:** Used for main cable runs in commercial buildings or light industrial applications.
